

Elementary K-3 Salato Scavenger Hunt

Welcome to the Salato Wildlife Education Center. The habitats and animals you see are native to Kentucky. Native means that an animal or plant has always lived here and was not brought in from another place.

1. How many birds are on the ceiling? _____ What is the largest bird you see? _____

2. Can you find the live bee hive? What is another animal that likes to eat honey?

3. Which kind of fish in the warm water aquarium has the longest nose?

4. List three things that bullfrogs have been known to eat: _____

5. What is the wild turkey's best defense against predators? _____

6. Name three venomous snakes in Kentucky. _____

7. How many frogs can you find in the Eastern Kentucky Forest diorama (next to the venomous snakes)? _____.

8. Name four kinds of fish that are raised in our fish hatcheries: _____

9. Name two animals that have been restored to Kentucky: _____

10. Describe some things (living and non-living) you saw in the Wildlife Viewing Area.

11. Are all toads frogs? _____ Are all frogs toads? _____
